

Isotop[®] Compact damper

for motors and small compressors

Getzner presents new multi-purpose damper as a better alternative to rubber-metal products.

The new Isotop[®] Compact damper can be used individually on all loads between 5 kg and 100 kg. The product is compact and designed with a universal M 8 bushing/threaded pin connection.

The damper is supplied without a metallic footplate and can be placed straight on the floor. Due to the high static friction, floor mounting is not usually necessary.

Use of high-performance Sylomer® makes the damper significantly more effective than rubber-metal products. It has a defined efficiency of insulation and the material does not become hard or brittle over time.

As a result, this compact damper is able to easily outlast all commercially available rubber-metal products.

PRODUCT DETAILS

APPLICATIONS

- All types of
- Compressors
 - Emergency power generators
 - Heat pumps
 - Motors, etc.

TECHNICAL DATA

Type	Colour	Max. load in kg
Isotop Compact-4	blue	4,0
Isotop Compact-9	pink	9,0
Isotop Compact-15	brown	15,0
Isotop Compact-20	red	24,0
Isotop Compact-40	dark green	40,0
Isotop Compact-50	grey	50,0
Isotop Compact-70	dark blue	78,0
Isotop Compact-80	turquoise	82,0
Isotop Compact-100	violet	100,0

Threaded connection: M 8
 Surface protection: galvanised
 Diameter: 52 mm
